

## Oracle Database 10g: Administration Workshop I Release 2

**Duração:** 5 Dias

### Objetivos do Curso

This course is your first step towards success as an Oracle professional, designed to give you a firm foundation in basic database administration. In this class, you'll learn how to install and maintain an Oracle database. You will gain a conceptual understanding of the Oracle database architecture and how its components work and interact with one another. You will also learn how to create an operational database and properly manage the various structures in an effective and efficient manner including performance monitoring, database security, user management, and backup/recovery techniques. The lesson topics are reinforced with structured hands-on practices. This course is designed to prepare you for the corresponding Oracle Certified Associate exam. This course counts towards the Hands-on course requirement for the Oracle Database 10g Administrator Certification. Only instructor-led inclass or instructor-led online formats of this course will meet the Certification Hands-on Requirement. Self Study CD-Rom and Knowledge Center courses DO NOT meet the Hands-on Requirement.

Learn To:

- Install the Database
- Back up and Recover Data
- Administer Users
- Transport Data between Databases
- Manage Data
- Configure the Network

### Público

- Administrador de Banco de Dados
- Consultor Técnico
- Database Administrators
- Database Designers
- Project Manager
- Sales Consultants
- Support Engineer
- Technical Consultant

### Pré-requisitos

*Pré-requisitos Recomendados*  
Working knowledge of SQL

### Objetivos do Curso

- Install Oracle Database 10g and configure a database
- Manage the Oracle instance
- Manage the Database storage structures
- Create and administer user accounts

Perform backup and recovery of a database  
Monitor, troubleshoot, and maintain a database  
Configure Oracle Net services  
Move data between databases and files

## **Tópicos do Curso**

### **Introduction (Database Architecture)**

Describe course objectives  
Explore the Oracle 10g database architecture

### **Installing the Oracle Database Software**

Explain core DBA tasks and tools  
Plan an Oracle installation  
Use optimal flexible architecture  
Install software with the Oracle Universal Installer (OUI)

### **Creating an Oracle Database**

Create a database with the Database Configuration Assistant (DBCA)  
Create a database design template with the DBCA  
Generate database creation scripts with the DBCA

### **Managing the Oracle Instance**

Start and stop the Oracle database and components  
Use Enterprise Manager (EM)  
Access a database with SQL\*Plus and iSQL\*Plus  
Modify database initialization parameters  
Understand the stages of database startup  
View the Alert log  
Use the Data Dictionary

### **Managing Database Storage Structures**

Describe table data storage (in blocks)  
Define the purpose of tablespaces and data files  
Understand and utilize Oracle Managed Files (OMF)  
Create and manage tablespaces  
Obtain tablespace information  
Describe the main concepts and functionality of Automatic Storage Management (ASM)

### **Administering User Security**

Create and manage database user accounts  
Authenticate users  
Assign default storage areas (tablespaces)  
Grant and revoke privileges  
Create and manage roles  
Create and manage profiles  
Implement standard password security features  
Control resource usage by users

### **Managing Schema Objects**

Define schema objects and data types

- Create and modify tables
- Define constraints
- View the columns and contents of a table
- Create indexes, views and sequences
- Explain the use of temporary tables
- Use the Data Dictionary

### **Managing Data and Concurrency**

- Manage data through SQL
- Identify and administer PL/SQL Objects
- Describe triggers and triggering events
- Monitor and resolve locking conflicts

### **Managing Undo Data**

- Explain DML and undo data generation
- Monitor and administer undo
- Describe the difference between undo and redo data
- Configure undo retention
- Guarantee undo retention
- Use the undo advisor

### **Implementing Oracle Database Security**

- Describe DBA responsibilities for security
- Apply the principal of least privilege
- Enable standard database auditing
- Specify audit options
- Review audit information
- Maintain the audit trail

### **Configuring the Oracle Network Environment**

- Use Enterprise Manager for configuring the Oracle network environment
- Create additional listeners
- Create Net Service aliases
- Configure connect-time failover
- Control the Oracle Net Listener
- Test Oracle Net connectivity
- Identify when to use shared versus dedicated servers

### **Proactive Maintenance**

- Use statistics
- Manage the Automatic Workload Repository (AWR)
- Use the Automatic Database Diagnostic Monitor (ADDM)
- Describe advisory framework
- Set alert thresholds
- Use server-generated alerts
- Use automated tasks

### **Performance Management**

- Use Enterprise Manager pages to monitor performance
- Use the SQL Tuning Advisor
- Use the SQL Access Advisor
- Use Automatic Shared Memory Management

- Use the Memory Advisor to size memory buffers
- Use performance related dynamic views
- Troubleshoot invalid or unusable objects

### **Backup and Recovery Concepts**

- Identify the types of failure that may occur in an Oracle Database
- Describe ways to tune instance recovery
- Identify the importance of checkpoints, redo log files, and archived log files
- Configure ARCHIVELOG mode

### **Performing Database Backups**

- Create consistent database backups
- Back your database up without shutting it down
- Create incremental backups
- Automate database backups
- Monitor the flash recovery area

### **Performing Database Recovery**

- Recover from loss of a control file
- Recover from loss of a redo log file
- Perform complete recovery following the loss of a data file

### **Performing Flashback**

- Describe Flashback database
- Restore the table content to a specific point in the past with Flashback Table
- Recover from a dropped table
- View the contents of the database as of any single point in time with Flashback Query
- See versions of a row over time with Flashback Versions Query
- View the transaction history of a row with Flashback Transaction Query

### **Moving Data**

- Describe available ways for moving data
- Create and use directory objects
- Use SQL\*Loader to load data from a non-Oracle database (or user files)
- Explain the general architecture of Data Pump
- Use Data Pump Export and Import to move data between Oracle databases
- Use external tables to move data via platform-independent files
